

NHS Sub Committee Peer Support Group

We run a peer support session bi-monthly that is facilitated by one of the committee who are all experienced dramatherapists currently working within the NHS. This is an open group that you do not need to sign up for. The focus of this group is for those working within the NHS but those who have an interest in working in the NHS are welcome to join. We alternate between an evening and daytime session.

Offer a safe and confidential space to explore and share some of the challenges and experiences that you are facing within your trust

To share ideas and ways of working within the NHS

To promote a space for peer reflection and support outside of your Trust where maybe you are the only Dramatherapist practice

To share information and knowledge around HCPC, AHP initiatives and other relevant current news within the health sector

It is important that this group meets the needs of BADth members working in the NHS and those that attend the group, in order to do this we will be asking for feedback on your experience of attending the group or if you have other needs to be met by this group.
