

Creativity in Supervision

Wednesday 19th October 2022 (7.30pm - 9.30pm)

Zoom

- Does your creative spark need nourishment in supervision?
- Do you want to use more creativity in your supervision practice?
- Are you interested to explore more intuitive and embodied practices within supervision and the supervisory relationship?

In this workshop you are invited to draw on your existing creative practice to enhance the supervisory experience and deepen the use of creative methods in supervision.

Facilitated by the **BADth Supervision Subcommittee**, using creative reflection, group discussion and mutual support this workshop encourages you to enliven the creative possibilities in supervision, expand and stretch the professional partnership between Supervisor or Supervisee and deepen the insights into client's experiences.

This CPD workshop is **suitable for both supervisors and supervisees** in practice, those considering training in creative supervision and/or those wishing to enhance their course hours or undertake additional practice to compliment their active training course.

It will take place online with an in-person workshop taking place in February 2023. Both events are standalone or can be taken together to deepen your reflective practice.
